

The Bayerisches Geoinstitut at the University of Bayreuth invites applications for a

Research Scientist (fixed term)
(Akademischer Rat/ Akademische Rätin auf Zeit)

in **experimental geosciences**. The Bayerisches Geoinstitut (www.bgi.uni-bayreuth.de) is a leading institution for research in Earth and planetary sciences using advanced experimental, analytical and computational techniques. Current research activities focus on understanding the internal structure, dynamics and evolution of the Earth and planets.

The successful applicant is expected to carry out independent research in any field of experimental geosciences, including—but not limited to—**mineral physics, petrology, geochemistry, cosmochemistry, geodynamics, planetology, volcanology, or ore deposits**. Responsibilities will also include laboratory management and the acquisition of external research funding.

The position can be filled for six years. A formal requirement for application is a Ph.D. in Earth Sciences or a related field and a good research record as demonstrated by publications in international journals. Applications should include a CV, publication list, copies of university certificates, a short (2 page) statement of research interests and the contact details of three referees.

Applications should be sent **in one single pdf file** to bayerisches.geoinstitut@uni-bayreuth.de until August 1, 2025. Informal inquiries may be directed to Hans Keppler (hans.keppler@uni-bayreuth.de, phone +49 921 553744).

The University of Bayreuth is an equal opportunity employer and views the diversity of its staff as an asset. It is expressly committed to the goal of gender equality.
